Vision Composite Products Achieves ISO 9001 Quality Management Systems Certification From NSF International Strategic Registrations (NSF-ISR)

ISO 9001 certification demonstrates Vision Composite Products commitment to quality.

Decatur, Alabama, January 11, 2023 – Vision Composite Products has achieved ISO 9001 Quality Management Systems certification from [NSF-ISR](#), an NSF company. The standard helps organizations reliably meet the needs of clients in both the delivery and continuous improvement of products and services.

Utilizing the experience gained from over 40 years of wheel design and manufacturing, Vision Composite Products has changed the game by inventing a proprietary, highly scalable solution for creating structural carbon fiber products. While currently specializing in Carbon Fiber Forged® wheels, Vision Composite Products continues to invest and grow to provide the next generation of lightweighting technology to be used across many diverse industries.

“Here at Vision Composite Products, we pride ourselves on providing products that continue to push the boundaries for creating greater accessibility to next generation technology through affordable, robust, and scalable manufacturing processes.”

ISO 9001 is based on quality management principles such as a strong customer focus, the involvement of top management, the process approach and continual improvement. Certification to ISO 9001 helps companies provide consistent, good quality products and services.

“Through certification to ISO 9001, Vision Composite Products is able to not only improve their products, process and service quality, but also helps them reduce waste,” states Jen Morecraft, Senior Director of NSF-ISR. “This shows Vision Composite Products commitment to improve their business and meet customer expectations globally.”

The standard focuses on performance through a combination of risk-based thinking and a process approach, as well as employment of the “plan-do-check-act” cycle at all levels in the organization.

About NSF

[NSF](#) is an independent, global organization that facilitates standards development, and tests and certifies products for the food, water, health sciences and consumer goods industries to minimize adverse health effects and protect the environment. Founded in 1944, NSF is committed to protecting human health and safety worldwide. With operations in 180 countries, NSF is a Pan American Health Organization/World Health Organization Collaborating Centre on Water Quality, Food Safety, and Medical Device Safety.

About NSF-ISR

NSF International Strategic Registrations (NSF-ISR) offers a comprehensive portfolio of management systems registration solutions to meet the demands of the global marketplace ([nsf-isr.org](#)). NSF-ISR is the largest automotive registrar in North America and is recognized by the International Automotive Task Force (IATF) to provide IATF 16949 registrations in the automotive sector. NSF-ISR also provides registrations for the following programs: ISO 9001, ISO 14001, ISO 45001, AS 9100/10/20, ISO 13485, ISO 20000-1, Responsible Care (RC) 14001 and Responsible Care Management Systems (RCMS), as well as greenhouse gas verification/validation.
